

## Great New Beginnings SAFETY GUIDELINES

Updated June 8<sup>th</sup>, 2023

As we continue to rely on expert protocols from the CDC, Public Health, Office of Child Care Licensing, and the Governor's office, we want our families and team members to know that the environment at Great New Beginnings is as safe and virus-free as possible.

Hand Sanitizing Stations will be located at the lobby entranceway to the building. Hand sanitizer stations, wipes and soap and water will be readily available for all staff at all times. High traffic areas and public areas will be cleaned with higher frequency in accordance with Public Health and CDC Guidelines.

We have elevated cleaning protocols throughout our buildings to include the thorough cleaning of all high-touch points, toys, and surfaces, including the playground equipment. Our standard cleaning supplies include hospital-grade disinfectants that are EPA registered and directly ordered through Cintas weekly to be sure our supply is always in stock. We have also purchased a Halo Sanitizing machine that has the ability to deliver complete surface disinfection throughout any room with the press of a button, delivering a precise amount of disinfectant solution to eliminate pathogens in a myriad of complex spaces found in healthcare, long-term care, and life sciences facilities, as well as in daycares, schools, athletic facilities and more.

We retain a licensed janitorial company to clean our buildings each evening to make sure that we are starting each day with a sanitized and clean environment.

Children's items will remain separated from other students and in their assigned cubby area to make sure that we are following both Public Health recommendations as well as best practices to keep our children healthy while at GNB. So, please make sure that the items you bring in for your child such as bedding and bookbags fit within the allotted storage space.

As always, any questions, please speak to one of our administrators.

GNB Management Team
